Art Unit: 1714

The amendment of 1/7/03 has been entered. Claims 1-61 are pending.

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-61 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 95/17475 Johnson in combination with US Pat. No. 5601878 Kranig et al..

Johnson discloses the instantly claimed color effect providing pigments. They inorganic coating thereon will necessarily have the instantly claimed index of refraction because the coatings are the same as those of the instant claims. Johnson differs from the instantly claimed invention in that he does not disclose the pigment's use in powder coatings, as required by the instant claims. It would have been obvious to one of ordinary skill in the art at the time of the instant invention to use the instantly claimed pigments in the instantly claimed powder coatings to achieve the color effects of the instantly claimed pigments because Johnson describes the effects of the instantly claimed pigments and these same effects would have been expected in a coating film obtained by a powder coating because pigments give similar effects whether used in powder, dispersion, or solution coatings and pigmenting powder coatings with conventional pigments, including metallic flakes is well known, as shown by the claims of Kranig et al. The applicant has not shown the additional ingredients of the reference to materially affect the basic and novel characteristics of the composition. It is therefore not seen that "consisting essentially of" excludes anything from the

Art Unit: 1714

composition of the reference. See *In re Janakirama-Rao*, 317 F 2d 951, 137 USPQ 893 (CCPA 1963) and *Ex parte Davis et al.*, 80 USPQ 448 (PTO Bd. App. 1948). In addition, the claims ultimately recite "comprising" and therefore encompasses any additional ingredients of the patentee. The applicant has given no probative evidence that the pigments of the patentee do not fall within the scope of those of the instant claims. No unexpected results, commensurate in scope with the instant claims and the cited prior art, are seen relating to the use of powder coating as the binder for the instantly discussed pigments.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
